

# POOLSENSE

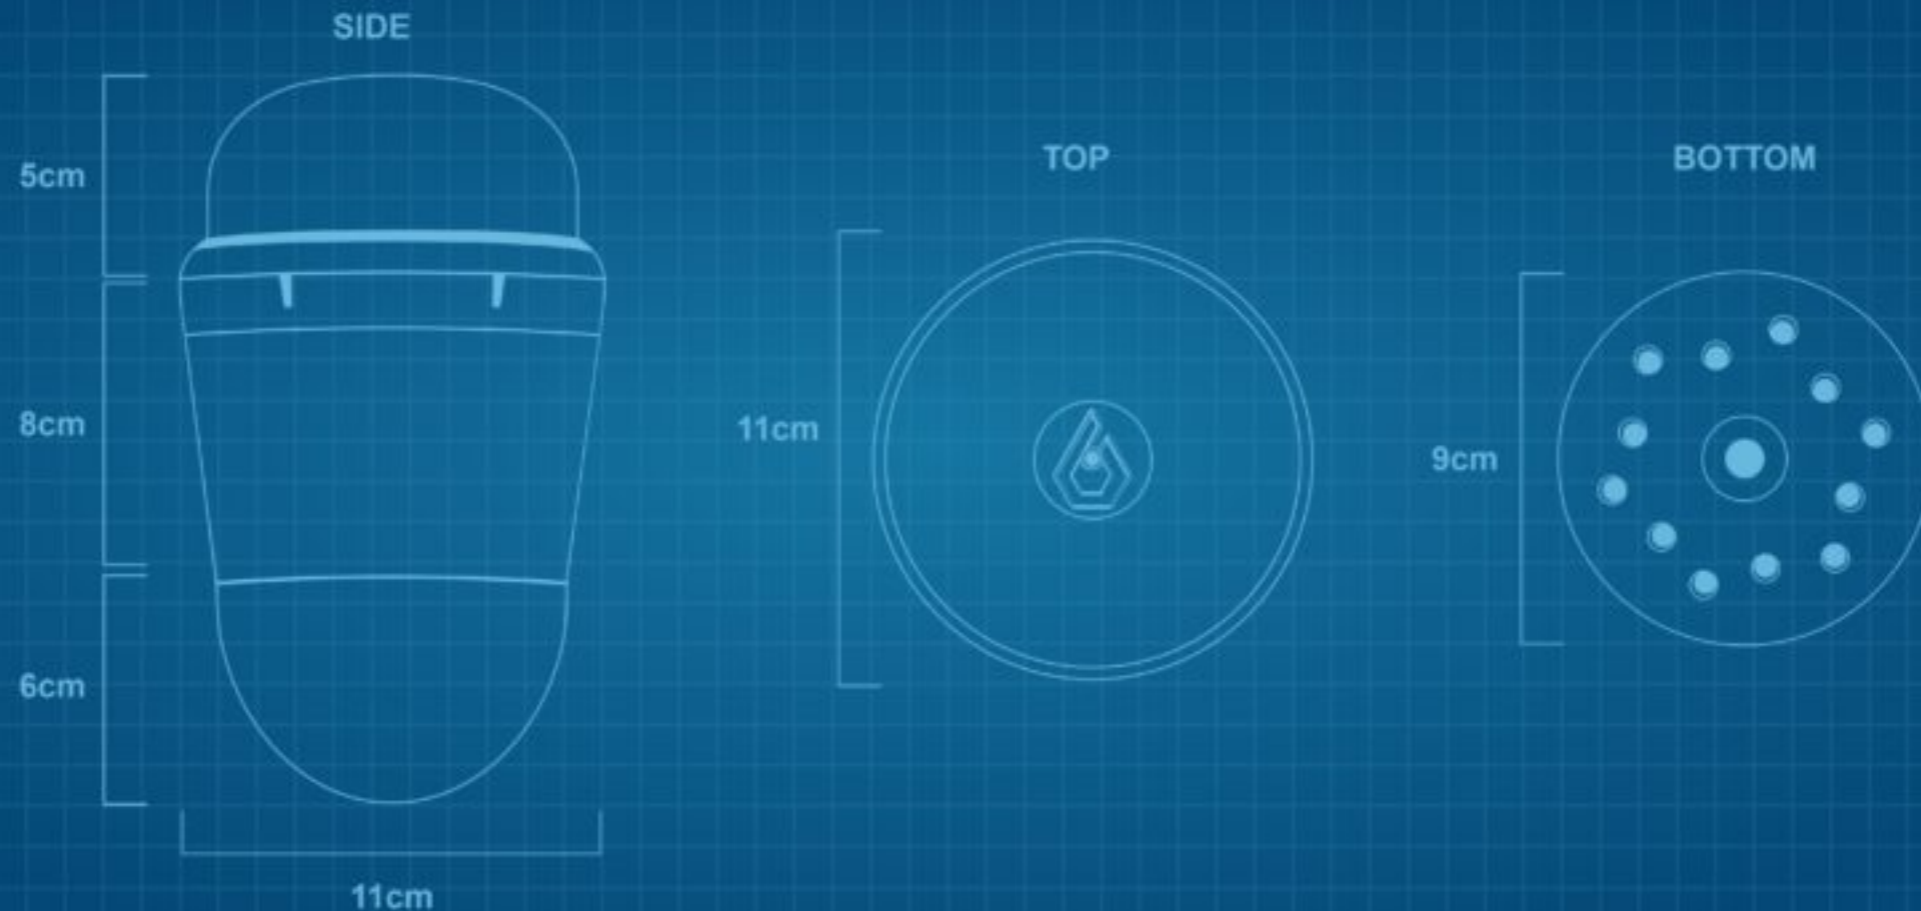

# POOLSENSE SMART POOL MONITOR AND APP

Pool maintenance is difficult and the water requires frequent testing.

Few people has proper knowledge of water chemistry which can lead to expensive shock treatments from over or under usage of chemicals.

- PoolSense makes pool care a hassle-free experience!
- Monitors your pool water quality 24/7. Intervals start at every 105 minutes and may increase as PoolSense learns about your pool over a longer period of time (smart).
- Analyses the data and notifies you via our app on your smartphone, every 24hrs at 18:00

Intelligent alerts on what chemicals to add to keep your water crystal clear.

# POOLSENSE FEATURES

- Smart App
- Fast and easy installation.
- 1 Year Battery Life
- Power efficient LPWAN
- Remote monitoring from anywhere in the world.

## HOME AUTOMATION

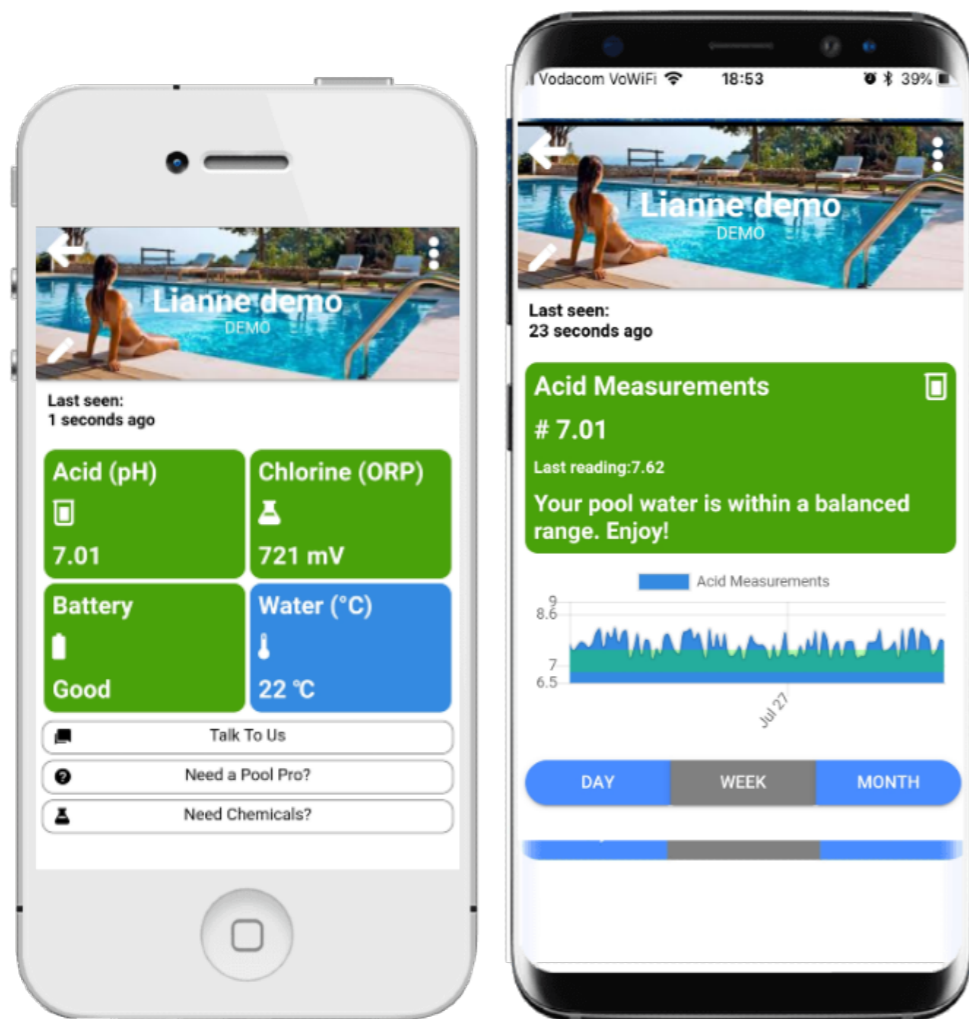

Integrate PoolSense with your home automation system. ProAutomation strives to bring innovative, smart, simple solutions to the connected IoT homes. Home Assistant is one of the great home automation systems that have already added PoolSense to their integrations with great success. By automating your spa water testing, you can have all your home automation appliances in one place, making life that much easier. PoolSense publishes data to the cloud via Sigfox in timed intervals so no need for wifi or Bluetooth connectivity.

# HOW DOES IT WORK?

You can now check on your pool/spa from anywhere and know instantly if the water is balanced and healthy. You can easily ensure the optimum temperature is kept. PoolSense works with an app on your smartphone and measures key water parameters like chlorine (Oxidation Reduction Potential), pH, and temperature.

## THE APP

The app will send smart notifications to your phone if you need to take action, every 24hrs at 18:00. For example, if your spa water test results show that your spa needs more chlorine, the notification will inform you and suggest adding 1 cup of chlorine to your spa as soon as possible. These micro-doses keep your water balanced and healthy and keep any bacteria or algae from growing in the water. No installation needed, just drop the device in your pool, hot tub or spa and finish with the easy setup process on the app. The battery has a 2 year lifetime so there is no need to charge it, it really is designed to make your life easier.

See how your pool/spa's water quality fluctuates over time by accessing your daily, weekly, and monthly graphs.

# POOLSENSE IN-LINE      POOLSENSE FLOATING

PoolSense In-Line requires installation by a pool professional. It fits into a pipe and is out of sight.

Floating PoolSense is a drop and go solution that is easy to install and maintain.

A vibrant, low-angle shot of three people (two women and one man) smiling joyfully in a swimming pool. They are all wearing bright yellow sunglasses. The water is clear blue, and sunlight creates a sparkling effect with many small bubbles and reflections. The people are leaning forward, their heads and shoulders above water, creating a sense of fun and summer relaxation.
